

Safe Reliable *Durable*

All our bags are designed to house multiple variations of our modules and pouches to suit your specific needs.

Working with Openhouse

Openhouse was founded in 1992 by our Chairman Brian Jones, who at the time was a Singer sewing machine repair man.

Fast forward 30 years and the company is still a family business at heart with his three children Andrew, Laura and Samantha taking over the reins as directors. And whilst Openhouse Products may be a family run-business, it's also one big, bustling extended family and every one of us has an important part to play.

The team at Openhouse work together each and every day to meet all desired customer requirements, whether it be a brand new prototype or a sourced contract. ***We work to the highest standards ensuring the word QUALITY reflects every department.*** We are very proud of our team and their continuous efforts to ensure we are always improving, championing personal and professional development opportunities for staff in all roles.

We take a unique approach to creating our products in focussing on a 'Fit For Purpose' end product. This means asking the right questions of our customers and really listening to their feedback to make them the ideal solution – after all, who's more of an expert on a customer's needs than the customer themselves?

Our focus on creating truly bespoke products along with the best possible purchasing experience means we have strong working relationships with our long standing customers of all sizes.

We love a challenge and no project is off limits for us – we've made everything from pig harnesses to hot air balloon bags and bariatric training mannequins to bullet proof first aid kits, to name just a few of our more unusual orders!

The Openhouse Family

MicrAgard™

a superior replacement to PVC

The idea for micrAgard™ first came about at the Ambex conference. The hot topic among paramedics visiting our stand was infection control, and the list of harmful bacteria that the average paramedic's kit bag would be exposed to.

The final result which we use today pushes the boundaries of innovation and design when it comes to infection control. However, we have never been one's to rest on our laurels, and as such, we will continue to improve MicrAgard in line with new technical advancements in order to provide our consumers with nothing but the best.

PROVEN TO BE 97.1% EFFECTIVE AGAINST CORONAVIRUS

All of our micrAgard range bags are made using our exclusive wipe-clean micrAgard fabric, which is over 97% effective against COVID, bacteria and superbugs.

The webbing used throughout this range is also treated with a water repellent and anti-microbial coating for extra piece of mind.

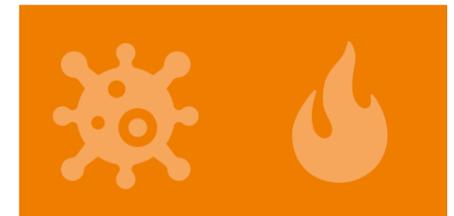

Also...

All bags within this range include reflective print to keep you visible and an ID window for easy labelling.

CQC compliant fluid repellent

non-rot material fire retardant

anti-microbial intrinsically safe

Smaller Backpacks

Our range of smaller backpacks are versatile and spacious with many pouches and pockets to store valuable items and equipment in.

Although small, they are mighty!

CLICK ON THE ARROW TO PURCHASE THE PRODUCT

Medical Equipment and Supplies

We are a leading supplier of medical products including Medical Oxygen, Defibrillators and a wide variety of medical consumables and pharmaceuticals.

We can also provide a managed service to advise you of upcoming expiry dates, ensuring you always have up to date equipment and consumables within your medical kit bag, ready for any emergency.

Some of our commonly used medical items can be found on our website, but we do offer our sourcing services for products that aren't standard off the shelf products.

From a basic first aid kit to a fully traceable kitted resuscitation bag, we are here to help.

Need your kit servicing? We do that as well. We offer service packages to take the hassle away from you. We will do a site visit every 12 months to ensure your kit bag is up to date and fully stocked.

Used your kit in an emergency? We offer a call out service within our service packages that could be ideal for you.

Contact us for more information on building your perfect medical kit and servicing package.
